lytx DriveCam™

PROGRAM ENHANCEMENT

ADAS MANAGEMENT

FOR FLEETS THAT NEED TO:

- Identify and coach undetected driving behaviors
- Improve CSA scores
- Reduce accident risk and severity

DID YOU KNOW?

- A single driver can easily generate 50-100 ADAS events per week.
- We review all those events so you don't have to, then prioritize and send the ones that require coaching directly to your DriveCam Online® inbox.

REVEAL UNSAFE DRIVING BY UNLOCKING THE FULL POTENTIAL OF YOUR ADAS

While Advanced Driver Assistance Systems (ADAS) provide warnings on the road, gauging their effectiveness is difficult without feedback. ADAS Management optimizes pre-installed ADAS signals by pairing them with meaningful data and video to help you identify – and proactively coach for – driving behaviors that trigger ADAS events.

THE TRUE ADVANTAGE

More powerful than ADAS alone
ADAS Management captures behaviors common during long-haul driving to give you data and insights that can help prevent collisions.

See the true causes of ADAS events
Our experts use data collected from over 45 billion driving miles to reveal behaviors that trigger ADAS, like distracted or drowsy driving.

Works with top ADAS systems
Optimizes industry-leading ADAS systems by enabling coaching opportunities for the over-the-road trucking environment.

HOW IT WORKS

ADAS Management captures three trigger types:

- Lane Departure Warnings (LDW) – leaving a lane without signaling

- Headway Warnings (HWW) – following another vehicle at a distance of 2 seconds or less

- Forward Collision Warnings (FCW) – increased potential for impact due to closing speed with the vehicle ahead by 0.7 seconds

COMPATIBLE HARDWARE

ER-SV2
DC3/DC3P*

ECM connectivity requires installation of compatible cable (installed and sold seperately).
